

Publications on Pekkton®.

Last update, February 2021

0. Game Changing Product 2016: Pekkton ivory high-performance polymer. Inside Dental Technology, November 2016.
1. Alqurashi et al, Polyetheretherketoneketone An emerging biomaterial for oral implants and dental prostheses, 2021
2. Alsadon O., Evaluation of the Optical Properties of PEKK based Restoration. Poster 3667, IADR Boston, March 2015.
3. Alsadon O., Structural Integrity of Poly-Ether-Ketone-Ketone (PEKK) based Bi-layered Molar Crowns, Poster BSODR 2015.
4. Arvai R., Una nuova classe di materiali "in sé", Pekkton® ivory il nuovo polimero ad alte prestazioni. Un caso clinico. Quintessenza Odontotecnica 2014;10:64-72.
5. Arvai R., Das neue Hochleistungspolymer Pekkton® ivory – eine Werkstoffklasse für sich. Quintessenz Zahntech 2014;40(11):1454-1464.
6. Chirazi N.; In der Humanmedizin bestens bekannt, in der Zahnmedizin "fast" ein Neuling (Zahn-Zeitung Schweiz Nr. 3/2016)
7. Chirazi N.; Pekkton® ivory – ein Hochleistungspolymer in der Implantat-, Total und Hybridprothetik (ZMK – Zahnheilkunde I Management I Kultur, 32. Jahrgang Juni 2016)
8. Copponnex T., DeCarmine A.: Reevaluating Thermoplastics. European Medical Device Manufacturer, March/April 2009.
9. Copponnex T.: Like a chameleon. Medical Device Developments, 2010
10. Copponnex T., Blümli M.: New material approaches in dental technology. meditec, October 2011
11. Dawson JH., Hyde B., Hurst M.; Polyetherketoneketone (PEKK), a framework material for complete fixed and removable dental prostheses: A clinical report. JPD 2017 Nov.
12. Digital Dentistry Yearbook (JP)_2015
13. Fokas G.; The effects of surface treatments on tensile bond strength of polyether-ketone-ketone (PEKK) to veneering resin. Journal of the Mechanical Behavior of Biomedical Materials; 93
14. Fuhrer M.; In-Vitro Untersuchung der mech. Eigenschaften von Primärstegkonstruktionen aus HLP (Masterarbeit 2015)
15. Fuhrmann G., Steiner M., Freitag-Wolf S., Kern M.: Resin bonding to three types of polyaryletherketones (PAEKs) - Durability and influence of surface conditioning. Dental Materials 2014 Mar;30(3):357-63.
16. Fuhrmann G., Dissertation: Klebeverbund zu PEKK – Einfluss der Konditionierungsverfahren und Hydrolysebeständigkeit. 2014.
17. Gama L., Duque T., Özcan M., Philippi A., et al; Adhesion to high-performance polymers applied in dentistry: A systematic review. Dental Materials 2020.
18. Gobert B.: C'est quoi le PEKK ? Technologie Dentaire, Décembre 2013 N° 324.
19. Gobert B.: Faux moignon anatomique en Pekkton. Technologie Dentaire, Décembre 2013 N° 324.
20. Hasan I. : Anwendung von Pekkton® ivory Gerüsten bei Implantat getragenen Deckprothesen auf nietenförmigen Verankerungssystemen als Pilotstudie (Poster DGPro2017)
21. Jacquot B.; Le PEEK et le PEKK: Bio Matériaux Clinique, Vol 2, N°1, mars 2017.
22. Jae-Won Choi, Eun-Ju Song, Jong-Hyun Shin, Tae-Sung Jeong, Jung-Bo Huh; In Vitro Investigation of Wear of CAD/CAM Polymeric Materials against Primary Teeth. Materials (Basel) Dec. 2017.
23. Katzenbach A.; Fatigue behavior of dental crowns made from a novel high-performance polymer PEKK
24. Keilig L., Katzenbach A., Weber A., Stark H., Bourauel C.: Biomechanische Untersuchung eines Hochleistungspolymer für den Ersatz in der dentalen Prothetik. Vortrag auf der Jahrestagung der Deutschen Gesellschaft für Biomechanik (DGfB) 2013 in Ulm.
25. Keilig L., Katzenbach A., Weber A., Ottersbach K., Brune M., Stark H., Bourauel C.: Dauerlastuntersuchung an Kronen aus einem Hochleistungspolymer. DGPro 2014, Aachen.
26. Keilig L., Katzenbach A., Weber A., Stark H., Bourauel C.: Dauerlastuntersuchung an Kronen aus einem Hochleistungspolymer. Poster DGPro 2014, Aachen.
27. Keilig L., Katzenbach A., Weber A., Stark H., Bourauel C.: Fatigue testing of crowns made from a high-performance polymer. EAO 2014, Rom.
28. Keilig L., Katzenbach A., Weber A., Stark H., Bourauel C.: Fatigue testing of crowns made from a high-performance polymer. Poster EAO 2014, Rom.

Publications on Pekkton®.

Last update, February 2021

29. Keilig L., Stark H., Bourauel C.: Biomechanics of Three- and Four-Unit-Bridges Made of Different Framework Materials – A Numerical Study. EAO 2014, Rom.
30. Keilig L., Stark H., Bourauel C.: Biomechanics of Three- and Four-Unit-Bridges Made of Different Framework Materials – A Numerical Study. Poster EAO 2014, Rom.
31. Keilig L., Stark H., Bourauel C.: Numerical Analysis of Dental Bridges. Made of different Framework Materials. Presentation CMBBE 10-2014, Amsterdam.
32. Keilig L, Stark H, Bourauel C. Does the Material Stiffness of Novel High-Performance Polymers for Fixed Partial Dentures Influence Their Biomechanical Behavior? The International Journal of Prosthodontics 2016; 30(6):595–7. DOI: 10.11607/ijp.4940
33. Keilig L.: Influence of the Framework Material on the Biomechanical Behaviour of Prosthetic Restorations. Abstract EAO 2018.
34. Kewekordes T, Wille S, Kern M.; Wear of polyetherketoneketones – Influence of titanium dioxide content and antagonistic material. Dental Materials 2018 March.
35. Kieschnick A.; PAEK ≠ PAEK: Wo liegen Unterschiede und für welche Indikationen sind die Materialien geeignet? (EADT 12-2016)
36. Klur T., Hassan I. PEKK-made indirect temporary crowns and bridges; a clinical pilot study. Clinical Oral Investigation. 2018
37. Kotthaus M.; In-vitro-Untersuchung zum Verschleiß von Pekkton® ivory Aussenkronen in Kombination mit unterschiedlichen Innenkronen bei Doppelkronensystemen mittels axialer Belastung (DGPro2017)
38. Kotthaus M.; Investigation of the retention forces of secondary telescopic crowns made from Pekkton® ivory in combination with primary crowns made from four different dental alloys: an in vitro study. Biomed. Eng.-Biomed. Tech. 2019
39. Kyeong-Hwan H., Implant- and Tooth-Supported Fixed Prosthesis Using a High-Performance Polymer (Pekkton) Framework. The International Journal of Prosthodontics, Volume 29, Number 5, 2016.
40. Kyowa; QDT Vol.40/2015 November Page 1627 – 1635.
41. Lasry F. : Réhabilitation complexe bimaxillaire utilisant un nouveau polymère : le Pekkton. Stratégie prothétique 11-12 2016 – vol 16, n°5.
42. Lee K.-S.: Biomechanical Evaluation of a Tooth Restored High Performance Polymer PEKK Post-Core System with A 3D Finite Element Analysis (BioMed Research International, Volume 2017)
43. Lee KS, Shin MS, Lee JY, Shin SW; Shear bond strength of composite resin to high performance polymer PEKK according to surface treatments and bonding materials. J Adv Prosthodont 2017 September.
44. McEnhill R.; Digital smile design and implant rehabilitation (May 2017)
45. Park J.-Y.: Evaluation of the marginal and internal gaps of three different dental prostheses: comparison of the silicone replica technique and threedimensional superimposition analysis (J Adv Prosthodont 2017;9:159-69)
